Plugin documentation

1.1 Last change

- Previous change

1.2 Purpose

This Domogik plugin WithingDevices allow user to see informations from withing API (user/measures).

You Need to create a withing dev account here https://oauth.withings.com/partner/add and create an application.

Save your Api key and Api Secret. You will need them later to configure the plugin.

1.3 Plugin configuration

1.3.1 Configuration

In Domogik administration section, go to client plugin-xeedevice details page.

Key	Default value	Description
startup-plugin	false	Automatically start plugin at Domogik startup
api key		Your Application api_key
api secret		Your Application api_secret
period	300	Refresh period from Xee API platform in seconds

1.3.2 Generating token from admin page

Once you have saved your credentails in Configuration go to the Advanced page to generate a token file.

In section **"Generating a Code for Token"** open th proposed link in a new tab to get the code from url after you validate the needed autorisation.

Paste the code in the input and clic on genrate token file.

1.3.3 Creating devices for withing device

In clients page of admin UI, go to **plugin-withingdevice-<your_host_domogik>**, select tab **"Devices"**, **"New"** to create your devices.

Chose one way creation by product or device type.
